Cyber Intel Service

Secure. Strategic. Intelligence-Led Cyber Operations

Capability Statement

Cyber defense, intelligence, and investigative support for high-risk digital environments.

Cyber | Intelligence | Digital Forensics | Incident Response | Secure Storage

Overview

Cyber Intel Service is the parent organization and cyber / cyber infrastructure provider within the CIS family. Founded by former U.S. Intelligence Community and U.S. law enforcement personnel, the organization supports public-sector, defense, law-enforcement, regulated, and mission-sensitive environments with intelligence-led cyber operations, investigative support, secure data handling, and incident response. We operate across blended physical-cyber risk environments where evidence preservation, operational discretion, and mission security matter.

Credentials + Company Data

SDVOSB-certified organization

CAGE Code: **9JLR6**

Top Secret / SCI capability

Selected credentials: CISSP, CISM, CISA, CASP+, Security+

Selected NAICS: **518210, 541511, 541512, 541519, 541690, 541990, 561611, 611420**

Supports agency, law-enforcement, intelligence, and prime-contractor engagements

01 Core Capabilities

- Cyber threat detection across networks, endpoints, cloud, and identity environments
- Threat assessments, actor profiling, and research on capabilities and emerging trends
- Dark web investigations for illicit activity, exposure, and actor presence
- Cyber incident response, containment, evidence preservation, and recovery
- Digital forensics for computers, mobile, cloud, audio, and video evidence
- Physical + cyber security assessments for blended-risk environments

02 Differentiators

- Former Intelligence Community and law enforcement experience
- Combines AI-enabled analysis with expert human intelligence and investigative tradecraft
- Multilingual investigators and globally distributed reach
- Blends cyber intelligence with field-ready investigative support
- Extensive support to federal, state, local, and special police force law-enforcement activity
- Mission support for government, defense, public safety, and regulated operations

03 Mission-Extension Services

- Secure storage and case management, 24/7 monitoring, and physical presence capabilities
- High-value target protection support and incident mitigation coordination
- UAS technology design, evaluation, training, and operationalization
- Device procurement, provisioning, and management for secure operations
- Aviation flight simulation systems and training support
- Counter-UAS strategy development and readiness support

Cyber Intel Service
Parent organization for the CIS operating family.
