

Unified Capabilities Statement

Integrated cyber, software, protection, and infra support for mission-critical and regulated environments.

Cyber Operations Civic Tech Protective Services Managed IT Investigations

Overview

Unified CIS is an integrated operating family led by Cyber Intel Service and composed of CIS Labs, CIS Law Enforcement, and CIS Stackworks. Together, CIS delivers intelligence-led cyber ops, secure software and civic technology, boots-on-the-ground protective and investigative support, and managed IT and infra services for government, defense, public safety, critical infrastructure, and regulated organizations. We’re built for environments that need disciplined execution, responsive support, and coordinated coverage across digital, physical, and operational risk.

The CIS operating family

Cyber Intel Service	CIS Labs	CIS Law Enforcement	CIS Stackworks
Threat detection	Secure software	Protective security	Managed IT services
Cyber intelligence	Data engineering	24/7 monitoring	M365 administration
Dark web investigations	API integration	Threat research and assessments	Helpdesk + endpoint ops
Incident response	Legacy modernization	Investigations	DevOps / cloud

01 Enterprise-Level Capabilities

- Intelligence-led cyber defense and investigative support
- Secure SaaS, custom applications, and system modernization
- Data engineering, analytics, workflow redesign, and mission software
- Managed IT, M365, endpoint operations, cloud / DevOps, VPN, and IaaS
- Protective security, monitoring, investigations, threat assessments, and training

02 Why Agencies + Primes Engage CIS

- One operating family across cyber, software, IT operations, and protection
- Mission-ready support from strategy through implementation and sustainment
- Secure-by-design engineering backed by operational field and protective support
- Government-oriented delivery built for accountability, continuity, and resilience
- Flexible teaming model for agency buyers, primes, pilots, rapid response, and long-term programs
